

E8 AC Sliding Gate System

E8 AC Sliding Gate is a high-tech product which can work on heavy load with low noise operation. It consists of main panel, control box, remote control, motor and gear rack. It uses magnetic sensor technology which combined with control panel to stop the motor when the gate successfully closed. Accurate speed operation gives you evidence in using the system. IP44 protection class is applying to the system to make it convenience and safety to use.

Specification	
Supply Voltage	AC 220-240V , 50HZ Single Phase
Operating Voltage	230V AC
Motor Type	Oil Bath Gear Motor
Motor Rotation Speed	1400 RPM
Operation Ambient Temperature	-20°C to 80°C
Absorb Power	250 Watts
Max Weight of Gate	600 Kg Force Adjustable
Gate Speed	12 Meter / Min
Safety Clutch	Electronic Hi-Amp Auto Reverse
Remote Controller	2-Channels, 330 Mhz UHF
Manual Optional	Special Released Key for Power Failure
