## TOTAL SECURITY SOLUTION

# ALARM SPRAY

*tactical defence system*

*ALARM SPRAY is the latest TACTICAL DEFENCE SYSTEM that is designed to protect your premises by incapacitating the intruder(s) instantly by spraying them with a powerful substance (Tactical Defence Spray). It will cause the intruder(s) to experience immediate eye closing, uncontrollable coughing, gagging and gasping for air. They will also feel intense burning sensation on their skin.*

*Alarm Spray substance is organically based, thus it is safe to use and there are no long term side effects. The recovery time for a normal person generally last for 45 minutes (if provided with fresh air and clean water to wash affected areas). Alarm Spray is also easy to install and user-friendly. It is activated by a long range remote control.*

*patent pending*

### Features : Alarm Spray Unit

- Equipped with Powerful Spray Substance to Incapacitate the Intruder
- Dual Detection PIR / Microwave (Temperature & Movement) to reduce false alarm
- Backup Battery for Emergency Situation
- Two (2) Built-In Siren (110 Decibel / each)
- LED to indicate System Status
- Metal Bracket Allow Easy Installation & Portability
- Allow External Alarm Connectivity

### Features : Alarm Spray Unit Remote Control

- Long Range Remote Control (80m to 120m in open space)
- Two-Way Communication Remote Control
- LCD Display to indicate the System Status :
  1. System Arm
  2. System Disarm
  3. Low Battery
  4. Alarm Spray Triggered
